Bonn, 21.06.2022

**Laboratory performance assessment 2022/1
of the residue monitoring fruit-vegetables-potatoes**

Dear Mr El Gharbaoui,

We are pleased to inform you about a successful result of the participation in the above-mentioned laboratory performance assessment 2022/1.

For the sake of the environment, you will no longer receive the certificate, the detailed report and the evaluation schemes on which this assessment has been based in printed form, now only in electronic form.

Your laboratory code is number **56**.

Please notice that the successful participation in this laboratory performance assessment is only **one** precondition in order to get the QS-approval in the field of the residue monitoring.

Regarding the achievement of full QS-approval please notice the current correspondence with the QS office.

The evaluation of the original routine test report in terms of content was not included into the test result. An individual evaluation of your submitted test report for compliance with the QS specifications does not take place. Point 6.8 of the residue monitoring guideline lists the points to be taken into account when submitting the report. If you have any questions, please do not hesitate to contact us.

Kind regards

Dr. Alois Fenneker

Claudia Rotter
